FOREWORD

The December issue of the URSI Information Bulletin has long included the names and addresses of the Officers of URSI and of the Member Committees of the Union. On the recommendation of the General Assembly in 1978, the addresses of members of various Working Groups and Committees have now been added.

The June 1979 issue will contain corrections and additions to the present lists. Member Committees which have not yet provided full information are requested to do so as soon as possible so that the records in the URSI Secretariat will be complete.

### PRECISION ELECTROMAGNETIC MEASUREMENTS

The biennial Conference on Precision Electromagnetic Measurements will be held from 23 to 27 June 1980 in Braunschweig, F.R. Germany and is being organised by the Physikalisch-Technische Bundesanstalt.

Lectures and discussions will deal with the realisation and maintenance of electrical units; DC and AC measuring procedures; HF and microwave measuring techniques used in studies of antennas and fields; time and frequency measurements; laser measuring techniques; automatic and computer-aided techniques. Two new fields will be included: fibre optics and cryo-electronics.

The best paper submitted on electrical precision measuring techniques will be awarded the Helmholtz Prize '80 of DM 5,000.- An exhibition of precision measuring instruments is being planned.

Further information is available from

Prof. Dr. H. Cappeller,

## ELECTROMAGNETIC COMPATIBILITY

Rotterdam, 1-3 May 1979

This biennial event was preceded by the two successful Montreux Symposia in 1975 and 1977. It will deal with problems of the interaction of electromagnetic energy with electronic and biological systems, and with the immunity of electronic systems to interference, as well as with their compatibility in relation to the electromagnetic environment.

The Symposium will be inaugurated by Dr. Ph. Leenman, Director General of the Dutch PTT on 1 May. The Keynote Address will be given by Mr. G.H. Hagn (Chairman of URSI Commission E) who will speak on "Key Scientific Notes in EMC for 1979". Thereafter, there will be three parallel sessions on Magnetic fields, Biological effects, Spectrum management, Electromagnetic fields, and Immunity and susceptibility.

On 2 May the subjects will be Nuclear electromagnetic pulse (NEMP), Shielding, Predicting RFI effects in integrated circuits, and Communications and cables. There will be a special URSI Session on Modelling and measuring noise and interference.

On 3 May the subjects will be Effects of NEMP and lightning, EMI effects of power lines and systems, Measuring methods and production testing, Frequency analysis, synchronization and filtering, and Ignition and gas-discharge noise.

As usual several workshops are being arranged so as to provide ample time for discussion, and there will be several technical excursions and social events.

The 600-page Proceedings will contain the full text of 120 papers and will be available to participants on registration. The Registration Fee is 270 Dutch florins. Further information about the Symposium is available from

Dr. T. Dvorak,  
ETH Zentrum - HF,  
CH - 8092 Zurich, Switzerland.

During the Symposium, there will be a Technical Exhibition of instruments relevant to the field of EMC.
